Extension module with 4 switchable  
(internal/external) S<sub>0</sub> ports for  
COMmander 6000R/RX

- 4 S<sub>0</sub> ports, switchable external/internal
- Internal S<sub>0</sub> ports for system telephony and ISDN terminals

---

## Your advantages in detail

The COMmander 4S<sub>0</sub>-R Module (revision 3) equips the COMmander 6000R and 6000RX with four S<sub>0</sub> ports. All of them can be configured as external or internal S<sub>0</sub>

ports. The internal S<sub>0</sub> ports can be used to operate ISDN system telephones from the COMfortel series and normal ISDN terminals.
