Datasheet

COMmander® 8UP0 Module

Extension module with 8 U_{P0} ports for a 2-wire system to ISDN end device connection for COMmander 6000

- 2-wire connection of system telephones and ISDN terminals
- 8 U_{P0} ports for the connection of COMfortel system telephones
- Euro-ISDN (DSS-1) PTMP connection in conjunction with the U_{P0}/S_0 Adapter

Your advantages in detail

The COMmander $8U_{P0}$ Module equips the COMmander 6000 with eight 2-wire U_{P0} ports. The ISDN system telephones from the COMfortel series can be connected directly to these U_{P0} ports thanks to their automatic U_{P0}/S_0 detection. Combining it with the U_{P0}/S_0 Adapter creates a standard ISDN connection at the endpoint of the 2-wire line on which COMfortel system telephones and normal ISDN terminals can be operated.
