

COMfortel® M-520

The elegant one: compact, well-designed, and powerful

- Modern design – large 2.4" TFT-colour display with modern user interface
- Profiles for personal, meeting and noisy environments
- Searchable local phonebook with up to 500 vCards and corporate phonebook via PBX (XML, LDAP)
- PIN-protected keylock for optimum line security
- Scratch and disinfectant resistant

Your advantages in detail

The COMfortel M-520 isn't simply smaller – it's better in every way. The first thing you notice when you hold the handset is how great it feels in your hand; wider, significantly thinner and more elegant. The handset is loaded with business features enriched with Bluetooth®, audio profiles for specific situations.

The micro-USB port prepares the COMfortel M-520 for future software updates to support DECT networks. This makes the handset fit perfectly to the WS-500S IP single-cell and WS-500M IP multi-cell system. With a smooth, high-quality polymer surface that seamlessly meets the new 2.4" display, the handset is scratch- and disinfectant resistant.

Features at a glance

USER INTERFACE

- Illuminated, graphical 2.4" TFT colour display, 240x320 pixels, up to 8 lines and 65.000 colours

- Synchronise the handset directory with Microsoft Outlook®
- Upload of caller pictures / screensaver pictures
- Upload sounds (ringtones) from computer to handset
- Firmware update
- Direct dialling from Microsoft Outlook® contacts and display of incoming calls on the computer via CTI (Computer Telephony Integration) for Windows and macOS

INTERFACES

- DECT
- Bluetooth® for headset (hands free and headset profile) and for data exchange / firmware update
- vCard exchange with mobile phones
- Micro-USB for charging function and data exchange / firmware update
- Headset connector 2.5 mm

NOTE

- The correct placement of the radio cells is decisive for the smooth functioning of your IP-DECT system; we therefore recommend that you leave the dimensioning and configuration to a qualified specialist dealer
- A DECT measurement can be used to determine exactly where, for example, a further basis is required to ensure supply
