COMfortel H-500

Professional wireless headset for comfortable freedom of movement with highest sound quality

- Excellent sound quality thanks to wideband audio and noise cancelling
- Accept and end calls, volume control and microphone muting directly on the headset
- Ergonomic, extremely comfortable design
- Up to nine hours talk time
- Range warning

Your advantages in detail

You are not always at your desk, but still don't want to miss a call? You want the ability to fetch important documents during a call? No problem with the wireless COMfortel H-500, simply "take your call partner with you". The range of 100 m provides you with the necessary freedom of movement and if you ever get

too far away from your base, the range warning will alert you to lose your call.

The EHS support enables convenient handling: You can accept calls directly on the headset. You can also set the volume here or activate the mute function if you have any questions. With up to nine hours of actual talk time, the battery offers sufficient power for an entire working day.
