Sales Configurator – the easy way to the right system

Sales
CONFIGURATOR

Customer requirements for communication solutions are constantly increasing, and so are the complexity and scalability of ICT systems. Project planning therefore takes more and more time. Here the free Sales Configurator offers an easy and fast solution. This gives you the opportunity to efficiently project communication solutions and create project proposals.

Time is money – quick and easy to your perfectly planned project

All you have to do is enter your customer requirements into the Sales Configurator. Step by step, all technical requirements are queried here and based on this information, the tool assembles the perfect system for you.

A finished project proposal for your customer

The result of a project created by the Sales Configurator is an automatically generated project proposal that can be exported and passed on to the customer.

Always available, always up-to-date

The Sales Configurator is an online tool and can be used from anywhere via an Internet connection. Advantages for you: Our product catalogue is always kept up to date and you can access your offers from practically any computer.
